

INTELLIGENCE

Know the private market **before you enter the room**

NestLens Intelligence maps the entities and relationships that drive private capital — capital managers, allocators, funds, founders, and the ecosystem connecting them. It surfaces who is raising, who is moving, and who is connected to whom, so your next conversation starts with context instead of a cold search.

15,000+

Capital managers mapped

70,000+

People and contacts

23,000+

Relationships tracked

Live

Events and signals feed

The private market runs on relationships that no public database captures.

Who an allocator has backed, which partner just moved firms, which fund is quietly raising, how a founder connects to a check-writer — this is the information that actually moves deals, and it lives in scattered notes, inboxes, and memory. NestLens brings it into one structured, searchable, always-current view.

WHAT NESTLENS INTELLIGENCE GIVES YOU

Map the ecosystem

Every relevant firm, fund, person, and their connections in one graph.

Catch live signals

Fundraises, people moves, and market events as they happen.

Target with context

Walk into every conversation knowing the full picture first.

What we cover

NestLens organizes the private market into connected entity types, so you can move from a firm to its funds to its people to their relationships in a few clicks.

Capital Managers

VCs, PE firms, and GPs — strategy, focus, funds, and team.

Capital Providers

LPs and allocators — mandates, commitments, and preferences.

Investment Funds

Active vehicles — size, stage, status, and backers.

Capital Seekers

Startups and founders — stage, traction, and raise status.

Ecosystem Partners

Advisors, law firms, and service providers across the market.

People

Partners, directors, and contacts — roles and movements.

Ecosystem Builders

Studios, accelerators, and venture builders shaping the market.

Market Facilitators

Banks, brokers, and intermediaries that move deals forward.

Three ways to work with the data

Explore

Search and browse the full ecosystem. Filter by type, stage, geography, and more.

Signals

A live feed of fundraises, people moves, and market events relevant to you.

Track

Build lists, set alerts, and compare entities as your pipeline evolves.

Who uses it, and how

Different players, same underlying map. Here is what NestLens Intelligence unlocks for each.

Emerging Managers & GPs

Raising a fund, building an LP pipeline

Fundraising is a relationship problem before it is a pitch problem. NestLens shows you which allocators fit your thesis, who they have backed, and how you are connected to them.

- ✓ **Build a targeted LP list.** Filter allocators by mandate, stage, and geography instead of guessing.
- ✓ **Find warm paths.** See how you connect to a check-writer through people and firms you already know.
- ✓ 📍 **Time your outreach.** Reach allocators when signals suggest they are active.

LPs & Allocators

Sourcing and diligencing managers

Finding the right emerging managers early is an edge. NestLens surfaces new and active managers, their funds, and the context you need before a first meeting.

- ✓ **Discover managers early.** Spot funds raising before they are on every allocator's radar.
- ✓ **Understand the team.** See partner backgrounds, moves, and networks at a glance.
- ✓ **Map the field.** Compare managers within a strategy or geography side by side.

Founders

Raising capital, targeting the right investors

Most founders waste months pitching investors who were never a fit. NestLens helps you build a precise investor list and find the shortest path to each one.

- ✓ **Target the right funds.** Filter by stage, sector, and check size that match your round.
- ✓ **Find introductions.** See who in your network connects to a target investor.
- ✓🔥 **Research before pitching.** Know a fund's focus and recent activity before the first call.

Advisors & Service Providers

Law firms, placement agents, consultants

Your business depends on knowing who is active and who needs you. NestLens gives you a live view of market movement and the relationships around it.

- ✓ **Spot new business.** Catch fundraises and moves that signal demand for your services.
- ✓ **Map your market.** Understand the full landscape of firms and people you serve.
- ✓🌟 **Stay ahead of moves.** Track when key contacts change firms or roles.

Ecosystem Builders

Studios, accelerators, platforms

Connecting founders to capital is your value. NestLens gives you the map to do it faster and with better context for everyone in your program.

- ✓ **Match cohorts to capital.** Connect your founders to investors who actually fit their stage and sector.
- ✓ **Strengthen your network.** See and grow the relationships that make your platform valuable.

Why NestLens

Built for the parts of the private market that legacy databases were never designed to see.

1

Relationship-first

We map connections between entities, not just static profiles. That is where the real signal lives.

2

Emerging-market depth

Coverage of emerging managers and ecosystems that global databases underserve.

3

Live, not stale

Signals, events, and moves keep the map current, so you act on what is true today.

4

Access on your terms

Explore freely, then unlock the depth you need — entity by entity or across the board.

See the market **before your next raise or check**

We would love to show you NestLens Intelligence against your actual pipeline. A short walkthrough is usually all it takes to see where it fits.
